

**SECURE PAK**

High Visibility Packaging

## Highly Visible, Multifunctional

**Thelamco Secure-Pak™** paperboard combines rugged tear resistance and product protection with affordability. This high visibility packaging option is ideal for a wide variety of applications such as health and beauty products, consumer electronics, batteries, tools, hardware and more. While it's tough on the shelf, consumers can open Secure-Pak™ products easily and safely in the home with household scissors.

**Thelamco Secure-Pak™** paperboard is available in 0.010 to 0.024 caliper; film layers add 0.003 to finished caliper.

### With Thelamco Secure-Pak™ you get:

Fantastic reproduction of packaging graphics for stronger shelf presence

Ability to reduce energy usage with lower heat sealing temperatures or increase throughput by maintaining existing heat settings

Paperboard structure that is more sustainable than plastic clamshells with 60-80% less plastic on average

Lightweight structure that helps reduce warehousing, transportation and shipping costs
